AND WHEREAS the report received from the District Magistrate, North 24 Parganas vide Memo No.2258/DMA/N24PGS, dated 17.12.2025 reveals that:

1. Water logging- It was observed that water logging remains a serious and recurring problem in several parts of Basirhat Municipality, particularly during the rainy season. Ward Nos. 18, 19 and 20 are found to be fully affected, with large stretches remaining waterlogged for prolonged periods after rainfall. This results in severe inconvenience to residents, disruption of daily activities, and increased risk to public health. The existing drainage infrastructure appears to be inadequate to handle seasonal rainfall, and routine desilting and maintenance activities are either insufficient or irregular.
2. Irregular and inadequate water supply-The complaints regarding irregular and inadequate water supply were reported in several wards. During interactions with the locals, it emerged that such issues occur intermittently and are more pronounced during certain periods, particularly after heavy rainfall or disruption of supply.
3. Condition of Municipal Roads-The condition of roads under Basirhat Municipality was found to be unsatisfactory. Several roads are damaged, uneven, and poorly maintained, making them unsafe for vehicular as well as pedestrian movement. Potholes, broken surfaces, and lack of proper drainage along road margins were observed at multiple locations. Poor Road conditions also contribute to water logging and sanitation issues, thereby compounding existing problems.
4. Sanitation-Sanitation services, including regular road sweeping and waste removal, were found to be inadequate. In many wards, sweeping is not being carried out regularly, and accumulated waste was noticed along roadsides, drains, and public spaces.
5. Drainage System-. The inspection revealed deficiencies in the drainage system across almost all wards of Basirhat Municipality. In many locations, drains are either choked or damaged, resulting in stagnation of water instead of smooth flow.
6. Street Lighting and Public Safety-Maintenance of street lighting infrastructure was found to be Inadequate. Insufficient lighting adversely affects public safety, particularly for women, elderly persons and commuters, and also increases the risk of accidents and unlawful activities. Regular inspection, timely repair, and replacement of street lights appear to be lacking.

AND WHEREAS considering the submission of the Board of Councillors of the said Municipality, the findings made by the District Magistrate, North 24 Parganas through enquiry and the record of the Department, as mentioned hereinabove, it can be stated that the Board of Councillors of the said Municipality is not in a position to carry out its functions and to provide normal civic services. The State Government is of the opinion that the Board of Councillors of the said Municipality has shown its incompetence in the performance of the duties or in the exercise of the functions, imposed on it by or under the said Act and rules made thereunder or any other law for the time being in force;

NOW, THEREFORE, in exercise of the powers conferred by sub-section (2) of section 431 of the said Act, the Governor is pleased hereby to declare the Board of Councillors of the Basirhat Municipality to be incompetent to exercise the statutory functions imposed on it and to dissolve the Board of Councillors of the said Municipality with immediate effect.
